SUMMARY

Flutter Developer with 4 years of experience in building high-quality, cross-platform mobile applications using Flutter and Dart. Skilled in creating fast, scalable, and visually appealing solutions aligned with user needs and business goals. Strong in problem-solving, clean architecture, and delivering projects efficiently in agile environments. Committed to writing robust, object-oriented and maintainable code in fast-paced collaborative environments

EXPERIENCE

Mobile Developer

10/2023 – Present

Dotsquares Technologies India

- Developed and maintained 10+ Flutter applications for Android and iOS using a single codebase, reducing development effort by 40%.
- Integrated 20+ REST APIs, Firebase Authentication, Cloud Firestore, and Payment Gateways to deliver scalable mobile solutions.
- Implemented state management solutions using GetX, Provider, and BLoC, enhancing application performance and maintainability.
- Built reusable UI components and modular architecture, reducing feature development time by 30%.
- Collaborated with cross-functional teams in Agile environments to deliver 15+ successful production releases.
- Utilized Firebase Crashlytics and Analytics to monitor application health and improve stability.
- Leveraged AI-assisted development tools including GitHub Copilot, Cursor IDE, Claude AI, and ChatGPT to accelerate development and debugging workflows.
- Conducted code reviews and leveraged Git-based workflows, contributing to the successful delivery of 15+ production releases with minimal post-release defects.

Mobile Developer

11/2021 – 09/2023

Rayz Infotech

- Built and maintained scalable Flutter applications using reusable architecture, reducing feature development time by 30%
- Implemented state management using GetX and Provider, improving app responsiveness and reducing UI rendering issues
- Integrated Firebase Firestore, FCM, and Crashlytics, reducing production issue resolution time through real-time crash monitoring
- Improved deployment reliability by implementing CI/CD workflows and Git-based code review processes for collaborative development

TECHNICAL SKILLS

Core Technologies & Frameworks

Dart, Flutter SDK

AI-Assisted Development

GitHub Copilot, Claude AI, Cursor IDE, ChatGPT, Prompt Engineering, AI-Assisted Development, Code Generation, Rapid Prototyping, Code Review, Debugging

Tools & Platforms

Android Studio, Xcode, VS Code, Git, GitHub, Jira, Trello

Architecture & State Management

Bloc, GetX, MVC, MVVM

Backend & Databases

Firebase (Firestore, Authentication, Cloud Functions), REST APIs, SQLite

Other Skills

Push Notifications, Google Maps API, Payment Gateway Integration, Store Deployment, Responsive UI Design, Maestro

PROJECTS

Dating & Social Networking Apps

Engineered social networking mobile applications using Flutter and Firebase, implementing real-time chat, user authentication, matching features, and role-based access control.

Healthcare & Wellness Apps

Delivered healthcare and wellness solutions supporting appointment booking, health tracking, participant engagement, and personalized user management.

Booking & On-Demand Service Apps

Designed service booking platforms with scheduling, real-time tracking, payment integration, provider management, and customer feedback systems.

Property & Community Platforms

Created a scalable property rental application that streamlined property discovery through location-based search, premium listings, subscriptions, and real-time communication features.

Event & Media Applications

Developed event management and media streaming applications supporting QR-based event access, real-time content sharing, and multilingual audio streaming.

EDUCATION

Bachelor of Technology in Computer Science

2016 – 2020

Arya Institute of Engineering & Technology

81%
